

KSI/KAI

# IT Product Minimum Guidelines

In this guide, you will find a list of minimum hardware requirements in order to effectively utilize the KSI/KAI Software Platforms.

## Computer Hardware:

- Intel Processor I5 6500T (or Better)
- 8GB Memory DDR4 (16GB Recommended)
- 500GB 7200 RPM Hard Drive (1TB Recommended)
- Windows 10 Professional

## Software:

- Java (Latest Version 32bit)
- Google Chrome "latest version"
- Antivirus—Anti Malware Software (With Subscription)
- Symantec Endpoint Encryption (Laptops)
- Adobe Acrobat Standard XI (Or Later)
- Microsoft Office Home and Business 2016 (Or Later)

## Scanner:

- Fujitsu 7160 (Best)
- Brother ADS-2000 (Better)
- Canon ImageFormula P-215 II (Good)

## Notes:

These specifications reflect a baseline to provide a reasonably effective experience while utilizing the KSI/KAI system platforms. Some lesser variations of these specifications may work, but not offer a user friendly experience. As always we do recommend that you consult with your personal IT professional for guidance. If you have any questions regarding your system, please feel free to contact Jeff Welch at [jeffw@kovacksecurities.com](mailto:jeffw@kovacksecurities.com), or by phone at 954-670-8140.
